People-Oriented Computing for OEC	30 ECTS credits	German	✓	
Computing and Economics	30 ECTS credits	German		✓
Informatics	30 ECTS credits	German	✓	

* Students taking Informatics with Natural Sciences as a major study program must take a minor study program comprising 60 ECTS credits at the UZH Faculty of Science (see list on the Faculty website).

Students first decide on a degree program (either Business and Economics or Informatics) and then on a major study program and a minor study program. The table to the left contains all major and minor study programs offered to students enrolled in the Faculty of Business, Economics and Informatics.

A detailed overview of the content and structure of all study programs is available in the program regulations published on the Faculty's website.

Students may also select a minor study program at another UZH faculty, provided such programs are on offer. A list is published on the website of the Faculty of Business, Economics and Informatics.
