For your studies you first decide on a degree program (either Business and Economics or Informatics) and then on a major study program and a minor study program. The table to the left contains all major and minor study programs offered to students by the Faculty of Business, Economics and Informatics.

A detailed overview of the content and structure of all study programs is available in the program regulations published on the Faculty's website.

You may also select a minor study program at another UZH faculty. Select your degree program of choice in the online course catalogue to get an overview of all minor program combinations.
